

# CALIFORNIA STRATEGIC GROWTH COUNCIL

Downloading, installing, setting up, and operating Urban Footprint 1.5 is a team sport. We advise installation on a cloud server by your institutions system administrator. Setup and data management needs the work of qualified planning and GIS personnel.

Knowledge needed to install, load data, operate and maintain Urban Footprint includes:

- **Land Use Planning principles and techniques**
- **Environmental Impact Assessment**
- **Software systems administration**
- **The Linux operating system**
- **Postgres and PostGIS database management**
- **Geographic Information Systems development**
- **Object oriented programming**
- **Software troubleshooting**
