### Background on the Transformative Climate Communities Program

Assembly Bill 2722 created the Transformative Climate Community Program (Program), to be administered by the Strategic Growth Council, to “fund the development and implementation of neighborhood-level transformative climate community plans that include multiple, coordinated greenhouse gas emissions reduction projects that provide local economic, environmental, and health benefits to disadvantaged communities, as described in Section 39711 of the Health and Safety Code.” (Pub. Resources Code § 75240.)

On September 23, 2016, the Strategic Growth Council proposed to adopt the following regulations for the Program:

*Transformative Climate Community Program funds shall be allocated in the cities of Los Angeles and Fresno, and a third location. A minimum of half of the funds shall be allocated in the City of Fresno. A minimum of one fourth of the funds shall be allocated in the City of Los Angeles.*

The Council will develop the Program guidelines and selection criteria in phases. The first phase, which is the subject of this action, proposes to allocate a portion of total program funds for applications from specific geographic locations. Future phases of the guidelines development will specify selection criteria and competitive process for individual applications as well as procedures for Program implementation.

**As such, the rulemaking and hearing do not pertain to guidelines or selection criteria for the Program, which will be taken up at a future date.**

### Public Comments Related to the Proposed Regulatory Action:

- The public comment period for this regulatory action began on September 23, 2016. **To be considered by the Council, written comments not physically submitted at the hearing must be submitted by November 7, 2016 and received no later than 5:00 pm.** The Council will consider only comments submitted and received by that time.
